

LiveOffice
web edition

Datasheet

Overview

Live-Office web edition is a web-based professional solution. Live-Office web edition is an Open Source project. With Live-Office you can easily manage your appointments, events, contacts, internet bookmarks, files, pictures, music and much more. Live-Office is a powerful solution for personal use or business purposes. With the virtual desktop, Live-Office offers you the possibility to organize and view all information at the same time. This key feature can save you time and make Live-Office one of the greatest software on the market.

Live-Office is a 100% web-based management application. Live-Office offers a variety of features that help you to keep organize all your personal information when you need it. Using an intuitive user interface you manage your appointments, meeting, contact, notes, personal documents and many more live, anywhere and anytime using your computer or laptop.

Live-Office is the leader in open-source groupware application and is not related to any company. Our team has been dedicated to building the most reliable groupware application on the market. In addition, our team provides you the most innovating experience and secure Web-based groupware application consisting of a simple and easy to use groupware application on the market.

Our goal is to create the best groupware application on the market using the technologies you will need today and tomorrow. We have extensive experience building Web applications. We specialize in PHP, MySQL, JavaScript and Ajax.

Our philosophy is to create the best and easiest groupware software by using the free and open sources.

User:
